

POLICY STATEMENTS

1. CONTINUAL IMPROVEMENT

TTM intends to continually improve its environmental performance, and will monitor metrics such as those surveyed by the printed circuit board industry association to measure such improvement.

2. POLLUTION PREVENTION

TTM intends to prevent pollution by utilizing low toxicity raw materials; minimizing raw material and energy usage; and supporting recycled product markets whenever economically viable.

3. REGULATORY COMPLIANCE

TTM facilities shall operate in compliance with all applicable federal, state and local environmental regulations, customer and electronic industry requirements covering chemical use, air emissions, waste water discharges and waste management at all times.

Everyone's commitment to this fundamental policy and TTM environmental procedures will insure that TTM activities protect both human health and the environment in the communities where we operate. TTM is committed to providing the necessary capital, manpower, training, and management resources to fulfill this policy.

C = Continual improvement

P = Pollution prevention

R = Regulatory compliance
